TURNING AI INTO BUSINESS VALUE

Become a Future-Ready BI & AI Expert
Accelerate Your Career with Advanced Skills.

ADVANCED LEVEL TRAINING

Advanced Power BI, Fabric & Generative AI

Build Modern, AI-Powered Analytics Solutions for Real Business Impact

From Data to AI-Powered Insights

- Master advanced Power BI for deeper analytics and enterprise-ready solutions.
- Explore Microsoft Fabric for a modern, unified data and analytics platform.
- Apply Generative AI (ChatGPT, Copilot, Claude, Gemini) to automate, analyze and create greater business value.

Advanced Power BI | Microsoft Fabric | Generative AI | Real-World Projects

ADVANCED LEVEL TRAINING

Recommended for professionals who already have practical knowledge of Microsoft Power BI – Basic to Intermediate and know how to work with Power Query, Data Modeling, DAX Basics and Visualizing.

Starting **27th December, 2026** | Sundays Only **(Weekends)** | **2:00 PM – 6:00 PM**

Key Benefits for You

- Build Advanced Analytics Skills
- Use Microsoft Fabric for End-to-End Solutions
- Apply Generative AI in BI Workflows
- Work on Practical Business Projects
- Boost Your Career & Business Value

ADVANCED LEVEL TRAINING

Why This Program Can Change Your Career

From Data Skills to Income, Impact and Opportunity

EMOTIONAL BENEFITS — *A More Confident You*

- Build confidence in your advanced data & AI skills
- Become future-ready in a fast-changing world
- Stand out in the job market
- Move from routine reporting to strategic business insights
- Gain clarity and growth in your Power BI & AI career

PRACTICAL BENEFITS — *Skills for Real Impact*

- Work on real-world business scenarios
- Strengthen end-to-end BI and analytics skills
- Build and deploy scalable BI solutions
- Improve decision-making ability with data
- Apply Generative AI to solve real business problems

WHAT YOU'LL WORK WITH

Hands-on with Microsoft's Leading Data & AI Technologies

Advanced Power BI
Build sophisticated data models, DAX, and interactive, business-ready dashboards.

Power BI Services
Publish, share and manage enterprise analytics with governance and collaboration.

Microsoft Fabric
Build a modern data analytics solution with OneLake, pipelines and seamless data integration.

Generative AI
Use AI (e.g., Copilot) to analyze data, generate insights and accelerate BI development.

WHAT MAKES THIS PROGRAM DIFFERENT — *More Than Training – A Career Accelerator*

- Covers the complete modern data stack (Power BI, Fabric & AI)
- End-to-end learning from data preparation to AI-powered insights
- Hands-on, practical learning with real business scenarios
- Real-world projects and industry use cases
- Led by an expert trainer with 27+ years of global experience
- Global career and freelance opportunities

IMPORTANT PREREQUISITE

This is an advanced level training.
Participants should already have practical knowledge of Microsoft Power BI – Basic to Intermediate and know how to work with Power Query, Data Modeling, DAX Basics and Visualizing.

Don't wait until opportunities pass you by.
Upgrade your Power BI, Fabric and AI skills now.
Learn today. Earn tomorrow.

ADVANCED POWER BI

Advanced Power BI

Turn Data into Actionable Business Insights

LEARNING OBJECTIVES — What You Will Achieve

- Build advanced and interactive Power BI reports
- Design efficient and scalable data models
- Create powerful DAX measures and calculations
- Transform and clean data with Power Query
- Apply best practices for performance and governance

WHO SHOULD ATTEND — Ideal For Professionals

- Data and Business Analysts
- Reporting and BI Professionals
- Finance and Business Professionals
- IT and Data Management Professionals
- Anyone looking to build advanced Power BI skills

PROGRAM OUTLINE — A Practical, Hands-on Learning Journey

1 Working with Data in Power BI
- Data sources and connections
- Data transformation with Power Query
- Data cleaning and shaping techniques

2 Data Modeling & Relationships
- Designing an efficient data model
- Creating and managing relationships
- Star schema and best practices

3 DAX for Business Analysis
- Writing effective DAX measures
- Time intelligence calculations
- Advanced DAX functions for analysis

4 Advanced Visualizations
- Choosing the right visuals for insights
- Building interactive and custom visuals
- Using analytical visuals and KPIs

5 Interactive Reports & Dashboards
- Designing multi-page reports
- Using filters, slicers and drill-through
- Creating executive-level dashboards

6 Advanced Analytics
- Forecasting and trend analysis
- What-if analysis and scenarios
- Key business metrics and insights

7 Power BI Service & Sharing
- Publishing reports to Power BI Service
- Workspaces, apps and sharing
- Managing access and collaboration

8 Performance Optimization
- Improving data model and report performance
- Optimizing DAX and queries
- Handling large and complex datasets

9 Governance & Best Practices
- Security and data access (RLS)
- Report development best practices
- Deployment and lifecycle management

10 Real-World Capstone Project
- End-to-end business reporting solution
- Apply data modeling, DAX and visuals
- Present insights with key business takeaways

Online | Sundays Only (Weekend) | 2:00 PM – 6:00 PM | Starting 27th December, 2026

Data People Progress Together

ADVANCED LEVEL TRAINING

Power BI Services

Publish, Collaborate and Govern BI in the Cloud

Turn your data insights into real business impact with the power of the cloud.

Insights Anywhere Greater Together

MODULE OVERVIEW

This module covers cloud publishing, collaboration, dashboards, workspaces and distribution using Power BI Service. Learn how to turn your reports into secure, shareable solutions that drive business impact across your organization.

KEY TOPICS COVERED

- Fabric & Power BI Ecosystem
- Connecting to Data
- Workspaces
- Reports & Dashboards
- Sharing & Collaboration
- Gateways
- Dataflows
- Scheduled Refresh
- Row-Level Security
- Service Administration

PRACTICAL SKILLS YOU WILL GAIN

- Publish reports to Power BI Service
- Build engaging dashboards
- Create and manage workspaces
- Configure and manage apps
- Automate data refresh
- Set up governance basics
- Enable secure sharing and collaboration
- Work with Row-Level Security (RLS)

GENERATIVE AI IN THIS MODULE

Use Generative AI to work smarter with Power BI Service:

- Write compelling dashboard descriptions
- Create sharing notes and stakeholder summaries
- Summarize insights from reports
- Prepare user guides and documentation
- Troubleshoot service issues with AI assistance
- Improve report storytelling for different audiences

From Reports to Real-World Impact with AI

CAREER VALUE

Move from report creator to cloud BI professional.

- Work on real-world cloud projects
- Be job-ready for enterprise BI roles
- Strengthen your Power BI career path
- Gain skills highly valued by global employers

The Power of Your Data. Now in the Cloud.

Publish Securely | Collaborate Globally | Govern with Confidence | Create Bigger Impact

ADVANCED LEVEL TRAINING

Microsoft Fabric

Data Without Limits

Explore the Unified Analytics Platform of the Future.

One Platform Infinite Possibilities

MODULE OVERVIEW

Microsoft Fabric is a unified analytics ecosystem that brings together data engineering, data warehousing, real-time analytics, business intelligence and more — all on a single, SaaS-based platform. In this module, you'll learn how to use Fabric to work smarter, faster and more effectively with modern data.

CORE AREAS YOU WILL EXPLORE

- **OneLake** — A single lake for all your data
- **Lakehouse** — Open and unified data foundation
- **Data Warehouse** — Enterprise-scale analytics
- **Data Integration / Pipelines** — Ingest and move data at scale
- **Dataflows Gen2** — Low-code data transformation
- **Notebooks** — Code, analyze and collaborate
- **Semantic Models** — Unified business models
- **Power BI Integration** — Turn data into insights
- **Real-Time Analytics** — Analyze live data as it happens

WHY IT MATTERS

- Work in a modern end-to-end data platform built for the future.
- Connect data engineering and analytics in a unified experience.
- Support enterprise reporting and advanced analytics.
- Stay relevant in the evolving Microsoft ecosystem.

Modern Data Skills. Real Career Impact.

GENERATIVE AI IN THIS MODULE

- Use AI to explain Fabric concepts in simple terms.
- Draft notebook code ideas.
- Document and summarize workflows.
- Generate solution ideas for real-world scenarios.
- Accelerate your learning with AI-powered assistance.

AI + Fabric = Faster Learning. Bigger Possibilities.

Unify Your Data. Unlock Infinite Insights.

- One platform. Endless possibilities.
- From data to decisions — faster.
- Build, analyze and innovate with Microsoft Fabric.
- Be ready for the future of data.

CAREER VALUE

Future-ready skills for next-generation BI and data roles.

Invest In Skills Invest In Your Future.

GEN AI IN OUR PROGRAM

Gen AI Essentials

Use Generative AI to Learn Faster, Work Smarter and Deliver More Value

Generative AI will be integrated across the entire program after each module, helping you apply AI in real scenarios, reinforce your learning and solve real business problems with greater speed and confidence.

KEY TOPICS COVERED

- Prompt Engineering Basics
- AI for DAX
- AI for Dashboard Design
- AI for Content & Documentation
- Responsible Use of AI
- Productivity with ChatGPT, Gemini, Claude and Copilot

KEY BENEFITS FOR YOU

- **Faster Learning** — Grasp concepts quickly and apply them in real scenarios.
- **Better Problem Solving** — Get AI-powered guidance for complex challenges.
- **Stronger Productivity** — Automate routine work and focus on what matters.
- **Clearer Insights** — Turn data into actionable ideas faster.
- **Higher Professional Efficiency** — Achieve more with less effort.

Meet Your Trainer

Jahangir Sachwani

CEO, Consultant and Corporate Trainer, Innovinc AI
